Hi, I would like to formally submit my objection again to the proposed zoning changes to allow the development of high rise apartment complexes at the south west corner of Financial and Steeles. To be honest this is almost identical to my first objection as it does not look like much has been changed to address our original concerns.

The surrounding area is mainly a two story development the new design just does not blend in with the existing neighbourhood.

I am extremely concerned about the impacts to traffic in the area, not that long ago we widened Financial and Steeles as well as installing advance traffic lights to accommodate the increase in traffic and already it is insufficient and traffic is very much an issue again. It is getting so busy that people driving north on Financial and who want to turn right are using the lane beside the right turn lane as well, this is very dangerous. I am attaching a video of an evening to provide a sample of how busy it can get. It is in the summer as you can see the weather is very good, the right hand turn lane for steels is backed up on Financial south to almost Halstone.

I hear from parents there are insufficient schooling in the area and their children must be bused to other locations

Such an influx of residents can add additional load to our already overwhelmed hospital as well as the search for a family doctor in the area I hate to think of impacts of many years of construction in the area

I could go on and on but I think you get the gist of my concerns

Thanks for listening
