Subject: Park Street Proposal

Hello my name is Maxine Blesenthal and I live at [REDACTED] Brampton for 20+ years. I live directly behind the proposed massive 40 story building complex that is in question. While I understand the need for affordable housing, I am concerned about one being in my backyard. This structure will have a very negative effect on all the beautiful well keep homes on West Street. We will lose our morning sunlight and also will have constant shade on our homes. We also have 100 year old trees that will not survive this build, and most of these homes on Park Street have mature trees that would be destroyed when building. We are not against improvement on Park Street. Why can't we build quads or low rise homes. Mc Murchy had a similar issue and they've build beautiful brown stones to fit in with the downtown core. Please consider this before making any decisions on this permit.

Sincerely
Maxine Blesenthal
Concerned Owner
