Our Approach

Vivo Surgery is a cloud-based, SaaS solution that **expedites surgeons' mastery of modern techniques.**

Industry Challenges

✗ Technique mastery assessment delayed until later stages.

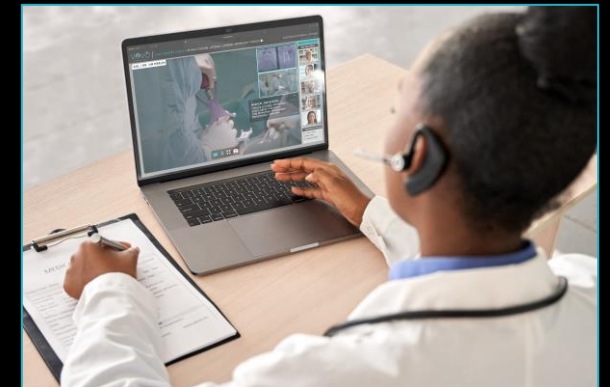

✗ Limited capacity for in person follow-up drives churn.

Vivo Surgery

1 Move technique mastery assessment upfront via interactive remote livestreams.

2 Remote assistance and assessment prevent reverting to old methods.

Testimonials

Surgical Residents

I loved the opportunity to hear questions through other learners' eyes. Moreover, the inclusion of a larger audience maximized the clinical pearls that could arise from a single procedure.

Gabriel Joseph, MD, MBA
Orthopaedic Resident
Hospital for Special Surgery (#1 ranking in USA)

Being a medical student in the OR can be intimidating, but Vivo Surgery gave us a surgeon's view, real-time answering of questions, and access to a specialty not offered at our school.

Hannah Moore, MD
General Surgery Resident
Texas Tech University Health Science Center

Surgeon Leaders

I felt connected into the OR while keeping all my appointments on a busy clinic day...and with a field of view that would be unattainable even if I was scrubbed in on location.

Dr. Amir Kachooei, MD, PhD
Hand and Wrist Surgeon
Rothman Orthopaedic Institute

Vivo Surgery allowed me real-time access to a complex & relevant case through the direct perspective of the operating surgeon, from 5,000 miles and seven time zones away!

Dr. Oleksandr Buby, MD
Head of Trauma Department
Poltava Regional Sklifosovskyi Clinical Hospital, Ukraine
