City Connect Event in Brampton

Opportunities for Collaboration

Who are we?

We are a social enterprise that is committed to facilitating professionalism and economic viability among black owned and operated businesses.

We commenced operations as a special interest community development association for aspiring entrepreneurs in the Nigerian immigrant community in June 2023 under the name Alliance of Nigerian Entrepreneurs ANE. Our vision was to support and promote their development as competent entrepreneurs across North America (Canada and USA). We recorded over 500% growth in just under 6 months.

However, starting in January 2024, we have repositioned to serve the entire black community by facilitating professionalism and economic viability for black owned and operated businesses. We have also changed our operating name to ANE Global.

We have a renewed mission

We have repositioned as a Chamber of Commerce with a mission to supporting the entrepreneurial development of the black community and have footprints across Canada and are few in the US

Vision:

To facilitate professionalism & economic viability among black owned and operated businesses

Mission Statement:

We identify, nurture and support aspiring and growth black entrepreneurs to own and operate economically viable businesses through platforms that facilitate networking, mentoring, training, and accessing funding required to innovate, execute and become established

Our core operations comprises

1.0 Chamber of Commerce

We are expanding our systems to enable us function more effectively as a chamber facilitating; networking, mentoring, training, and accessing funding required to innovate, execute and become established. Our membership is 350 and growing

Platforms:

- Collaborative platform

Toronto

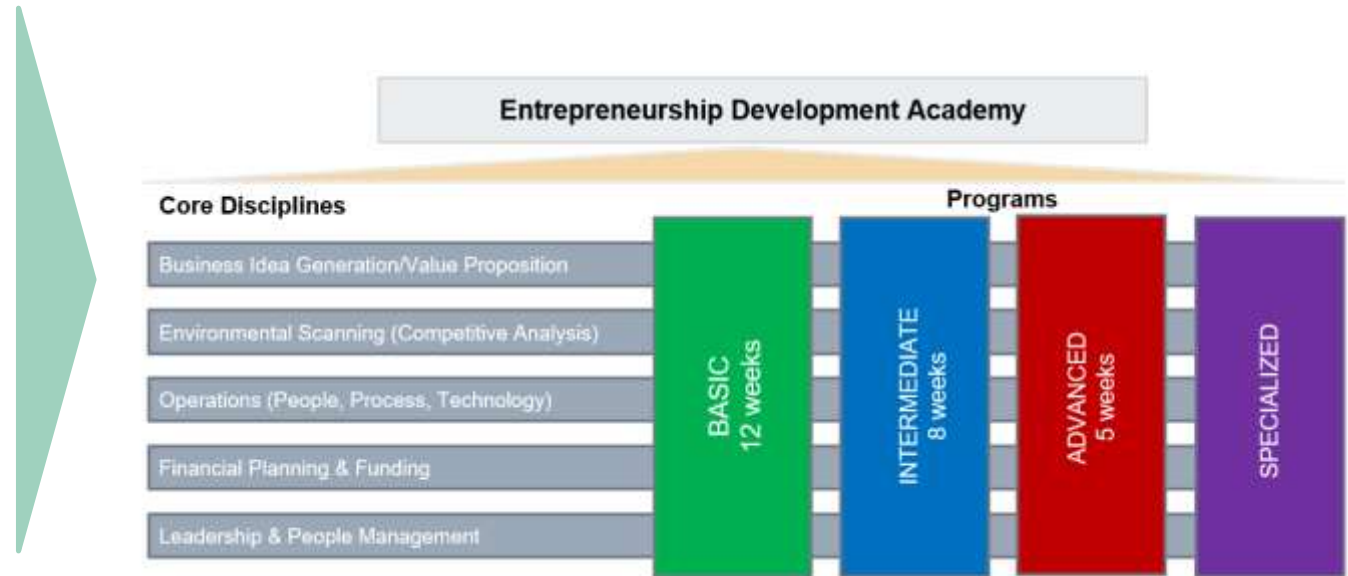

Our core operations comprises

2.0 Entrepreneurship Development Academy

We are nearing completion of plans to commence Entrepreneurship Development programs to provide our members with the competences required to execute their business ideas, hire the right personnel and attract funding assistance to grow and scale their businesses.

Additionally, we hosted trainings through an Entrepreneurs Summit, webinars and an upcoming symposium with Subject Matter experts

Our core operations comprises

3.0 Youth Empowerment Initiatives

Following a successful campus symposium that we hosted in February for the Black History Month, we are making plans to scale our youth empowerment initiatives working with several institutions across the country, to provide timely support on entrepreneurship development to students and fresh graduates

Opportunities for Collaboration

Brampton Vision 2040 - Count us in!

Consistent with our theme for 2024, Stronger Together, we are desirous of lending our support to the vision of Brampton to be a *city be arranged, governed, seen, and celebrated as a mosaic of people, places and endeavours of all kinds, coexisting in harmony*

Specifically, we can

- 1) Jointly provide interventions to promote Youth Empowerment
- 2) Create awareness to promote entrepreneurial development in black community

Five lenses for maximum success.

This Vision is about a smart way of doing things – an attitude – that will facilitate change that is popular, resilient, and innovative. These are lenses that reflect advanced practices everywhere but also suit the unique situation of Brampton. Together they are the ethic for action.

- **Lens 1: Public Engagement** – Citizens, as individuals and in corporate, interest, and cultural groups, will be involved in Brampton in a systematic and inclusive way, at all times on all matters undertaken for the community.
- **Lens 2: Collaboration** – The Brampton government will join forces, resources, and activities, as well as share decision-making, with Brampton private interests and senior governments to extend the reach and success of civic ventures.
- **Lens 3: Design** – Brampton will be a city 'by design', where design excellence is led by City Hall to ensure public interests, completed in a studio setting through co-design with developers and citizens, and made a prime factor in all approvals and other decisions for change.
