Subject: [EXTERNAL]Rezoning Application 30 Peel Centre Drive

Caution: This email originated from outside the organization. Do not click links or open attachments that you do not trust or are not expecting.

Good day Harsh

Just communicating with you regarding the above subject as I received a notification about it in the mail.

I currently live [REDACTED] and am very displeased to learn about this rezoning application. The construction of two very large towers (twice the size of the Bellair buildings) directly south of the Bellair buildings will have a very large negative impact for those who face south west in these two buildings. I have lived in my condo for over twenty years and have enjoyed the natural sunlight and unobstructed view.

I oppose the construction of the two large structures that have been proposed as the current enjoyable dynamic will be greatly changed. I am sure there are many others areas in Brampton where the larger buildings could be constructed that are very close to transit routes etc. that won't have such a negative impact on the surrounding areas. Queen and Dixie is already an extremely

busy area in Brampton and the potential existence of these very large buildings will just add to that congestion in a negative way.

How am I able to join the meeting taking place next Monday sept 9th at 7pm? Is it simply by joining the link in the communication that was emailed to the Bellair residents?

Also, the print on the Appendix 1 drawing is so tiny I cannot read it, which is frustrating.

Please advise

Regards

Janis Burns
