3.

Nature and extent of relief applied for (variances requested):

To permit site-specific development standards based on existing conditions. See accompanying Submission Letter for further detail

4.

Why is it not possible to comply with the provisions of the by-law?

See accompanying Submission Letter for further detail

5.

Legal Description of the subject land:

Lot Number

PT LT 6

Plan Number/Concession Number

CON 6 EHS CHINGUACOUSY

Municipal Address

2280, 2300 Queen Street East

6.

Dimension of subject land (in metric units)

Frontage

111.7 m

Depth

63.74 m

Area

9300 sq m

7.

Access to the subject land is by:

Provincial Highway

Municipal Road Maintained All Year

Private Right-of-Way

Seasonal Road

Other Public Road

Water

8. Particulars of all buildings and structures on or proposed for the subject land: (specify in metric units ground floor area, gross floor area, number of storeys, width, length, height, etc., where possible)

EXISTING BUILDINGS/STRUCTURES on the subject land:

Two Motor Vehicle Sales Establishment structures and surface parking areas

PROPOSED BUILDINGS/STRUCTURES on the subject land:

No change - existing site conditions are to remain intact

9. Location of all buildings and structures on or proposed for the subject lands: (specify distance from side, rear and front lot lines in metric units)

EXISTING

Front yard setback 17.8 m

Rear yard setback 43.9m

Side yard setback 11.0 m

Side yard setback 79.27 m

PROPOSED

Front yard setback 17.8 m

Rear yard setback 6.4 m

Side yard setback 11.0 m

Side yard setback 10.9 m

10. Date of Acquisition of subject land: December 14, 1984

11. Existing uses of subject property: Two Motor Vehicle Sales Establishment structures and surface parking areas

12. Proposed uses of subject property: No change

13. Existing uses of abutting properties: Commercial - Motor Vehicle Sales Establishment, Restaurant, Warehouse

14. Date of construction of all buildings & structures on subject land: Unknown

15. Length of time the existing uses of the subject property have been continued: 60+ years

16. (a) What water supply is existing/proposed?

Municipal
Well

☒
☐

Other (specify)

(b) What sewage disposal is/will be provided?

**RE: Consent and Minor Variance Applications
Polco Investments Limited
2250, 2280, 2300 Queen Street East, City of Brampton**

Glen Schnarr & Associates Inc. (GSAI) are the planning consultants to Polco Investments Limited (the 'Owner') of the lands municipally known as 2250, 2280 and 2300 Queen Street East, in the City of Brampton (the 'Subject Lands' or 'Site'). On behalf of the Owner, we are pleased to provide this Consent and Minor Variance Application to facilitate the creation of a new non-residential parcel and to permit modified development standards on the Subject Lands.

In support of the Applications, please find attached the following materials:

- A copy of the completed Consent Application Form for the access easement;
- A copy of the completed Consent Application Form for the lot creation;
- A copy of the completed 2250 Queen Street East Minor Variance Application Form;
- A copy of the completed 2280, 2300 Queen Street East Minor Variance Application Form;
- A copy of the Plan of Survey, prepared by Schaeffer Dzaldov Purcell Ltd, dated June 6, 2024;
- A copy of the Consent Sketch, prepared by GSAI, dated October 4, 2024;
- A copy of the Existing Conditions Plan, prepared by RH Carter Architects;
- A copy of the Minor Variance Sketch, prepared by GSAI, dated October 7, 2024.

Payment of full fees will be provided prior to circulation of the Applications.

SITE & CONTEXT

The Subject Lands are a commercial parcel, approximately 1.95 hectares (4.81 acres) in size, with frontage and access along Queen Street East. The Site, municipally known as 2250, 2280 and 2300 Queen Street East, is located on the north side of Queen Street East, east of Torbram Road. The Site is currently improved with three (3) commercial structures of varying size and surface parking areas. The area surrounding the Subject Lands is an established Employment Area containing a broad range of commercial structures and uses.

OFFICIAL PLAN & ZONING

The Site is designated 'Mixed Use Employment' by the in-effect Brampton Official Plan and is further designated 'Service Commercial' by the in-effect Airport Intermodal Secondary Plan. Furthermore, the Secondary Plan applies Special Site Area Policy 11. Special Site Area 11 states that the Site shall only be used as a new car sales establishment, together with related facilities. Overall, the in-effect designations permit a range of commercial uses, including motor vehicle sales establishments. Therefore, the Subject Lands contain a permitted use.

The Site is also subject to the City of Brampton Zoning By-law 260-2008 and is zoned 'Highway Commercial, Special Section 256 (HC1 -256). Motor Vehicle Sales Establishments are a permitted use. Special Section 256 establishes a series of site specific development standards related to maximum permissible commercial floor area, minimum lot area, minimum lot width, maximum building height and minimum landscaping.

PROPOSAL

The Owner is seeking permission to sever the Subject Lands into two (2) parcels so that each parcel can be held in separate ownership. For clarity, the 'Lands To Be Retained' as demonstrated on the accompanying Consent Sketch is to comprise the lands municipally known as 2580 and 2300 Queen Street East, while the 'Lands To Be Severed' are to comprise the lands municipally known as 2550 Queen Street East. Furthermore, no new construction or site alteration is contemplated.

The following provides a summary of the severance proposed:

Lands To Be Retained (2580, 2300 Queen Street East)

Area: 9,300 square metres (0.93hectares; 2.3 acres)
Frontage: 56.76 metres

Lands To Be Severed (2550 Queen Street East)

Area: 10,100 square metres (1.01 hectares; 2.49 acres)
Frontage: 111.69 metres

In addition to the above, a mutual access easement is contemplated. The access easement, comprising an existing drive aisle, is to facilitate the necessary legal arrangement to enable sufficient access to both lots to be provided. The location of the requested access easement is further demonstrated on the accompanying Consent Sketch and is to encompass an area of approximately 750 square metres (0.075 hectares; 0.185 acres).

SEVERANCE TESTS

In our opinion, the Proposal satisfies all of the criteria established by Section 51(24) of the *Planning Act*, as amended, based on the following:

The Severance Satisfies Provincial Interests

The Proposal implements applicable Provincial policies which encourage intensification and the efficient use of existing and planned infrastructure. The Proposal is consistent with the policies of the Provincial Planning Statement ('PPS'), 2024.

The Severance Is Not Premature

The Proposal satisfies the current and growing demand for employment opportunities within the City of Brampton in a manner that is consistent with the City Structure and the established character of the surrounding Airport Intermodal Employment Area. The consent process is the appropriate vehicle for the proposed severances and a Plan of Subdivision is not required. Based on the above, the Applications are not premature.

The Severance Conforms To The Official Plan and Adjacent Subdivisions

The Brampton Official Plan describes 'Mixed Use Employment' area lands as areas where employment-related development is to be encouraged and as such, a range of employment-related uses and built forms are permitted. The Proposal complies with the Official Plan's development criteria for Mixed Use Employment' areas. Additionally, the new lot and modified lot are in keeping with the existing and planned vision for the surrounding community. Therefore, it is our opinion that the proposed severances comply with the policies of the Official Plan.

The Dimensions and Shapes Of The Proposed Lots Are Appropriate

The dimension and shape of the proposed lots reflect the existing and evolving lotting pattern in the surrounding community. Additionally, the proposed lots have been appropriately designed to be consistent with those found in the surrounding area and to function independently. The development standards for the lots are met. The lots are therefore not out of character and are appropriate for the Site. Finally, the proposed lots are appropriate for the existing development conditions being retained.

No Unreasonable Restrictions Will Apply To The Severed Lots Or Adjacent Lands

Any required easement(s) will be secured as needed and the requested access easement is further demonstrated on the accompanying Consent Sketch. The access easement is required to enable appropriate and sufficient access to continue uninterrupted. The requested easement will not adversely impact the adjusted lots or adjacent lands. Servicing has been fully examined through the preparation of this application. No unreasonable restrictions will apply to the severed lot or adjacent lots.

The Proposed Severance Will Have No Impact On Existing Utilities, Municipal Services

The Subject Lands have access to full municipal services. There are also no servicing capacity concerns.

No Lands Conveyed For Public Purposes

A requirement for a widening has not been identified. Any required dedications will be secured as needed, and this Application will not preclude their future dedication.

The Plan's Design Optimizes The Available Supply, Means of Supply, Efficient Use and Conservation of Energy

To the greatest extent possible, the existing structures efficiently use energy and are in keeping with the requirements of the Ontario Building Code, as amended.

MINOR VARIANCES

As a result of the proposal to sever the Subject Lands, the need for zoning relief is required to recognize the existing site conditions, in relation to the modified lot boundaries. As such, the following is the relief from By-law 270-2004 that the Owner is seeking, organized by parcel.

Severed Lands

1. Section 6.17.1, By-law 270-2004

A parking space shall be a rectangular area measuring not less than 2.70 metres in width and 5.4 metres in length

A reduced size parking space measuring 2.5 metres in width and 4.35 metres in length, is requested.

2. Section 6.17.2.d), By-law 270-2004

A minimum aisle width of 6.6 metres is required.

A minimum drive aisle width of 4.2 metres is requested.

3. Section 24.1.2.2.h), By-law 270-2004

A minimum 20% of the required front yard as landscaped open space is required

4% of the required front yard as landscaped open space is requested.

4. Section 256.2.a, By-law 270-2004

A minimum lot width of 100 metres is required.

A minimum lot width of 56.0 metres is requested.

5. Section 256.2.d), By-law 270-2004

All buildings shall be located within the area identified as Building Area A and Building Area B on Schedule C – Section 256.

All buildings shall be permitted in the locations specified by the Existing Conditions Plan.

6. Section 256.2.e), By-law 270-2004

The total gross commercial floor area of the building identified as Building Area A on Schedule C-Section 256 shall not exceed 1,900 square metres.

A total gross commercial floor area of 3,075 square metres is requested.

7. Section 256.2.h, By-law 270-2004

A 4.5 metre wide landscaped open space area shall be provided and maintained along Highway Number 7.

A 4.4 metre wide landscaped open space area along Queen Street East is requested.

Retained Lands

1. Section 6.17.1, By-law 270-2004

A parking space shall be a rectangular area measuring not less than 2.70 metres in width and 5.4 metres in length

A reduced size parking space measuring 2.6 metres in width and 3.4 metres in length, is requested.

2. Section 6.17.2.d), By-law 270-2004

A minimum aisle width of 6.6 metres is required.

A minimum drive aisle width of 3.74 metres is requested.

3. Section 20.3.1, By-law 270-2004

A minimum number of 158 parking spaces are required.

147 parking spaces are requested.

4. Section 20.6.a), By-law 270-2004

A minimum of two (2) loading spaces are required.

One (1) loading space is requested.

5. Section 24.1.2.2.h), By-law 270-2004

A minimum 20% of the required front yard as landscaped open space is required

4% of the required front yard as landscaped open space is requested.

6. Section 256.2.d), By-law 270-2004

All buildings shall be located within the area identified as Building Area A and Building Area B on Schedule C – Section 256.

All buildings shall be permitted in the locations specified by the Existing Conditions Plan.

7. Section 256.2.f), By-law 270-2004

The total gross commercial floor area of the building identified as Building Area B on Schedule C-Section 256 shall not exceed 1,400 square metres.

A total gross commercial floor area of 2,840 square metres is requested.

8. Section 256.2.h, By-law 270-2004

A 4.5 metre wide landscaped open space area shall be provided and maintained along Highway Number 7.

A 4.4 metre wide landscaped open space area along Queen Street East is requested.

MINOR VARIANCE TESTS

Section 45(1) of the *Planning Act*, as amended, identifies the four tests which must be satisfied in order for the Committee to approve this application. Those tests are:

1. The variance maintains the general intent and purpose of the Official Plan.
2. The variance maintains the general intent and purpose of the Zoning By-law.
3. The variance is desirable for the appropriate development or use of the land.
4. The variance is minor in nature.

In our opinion, the requested variances are supportable and meet the four tests under the *Planning Act* in the following ways:

The Variance Maintains The General Intent & Purpose of the Official Plan

As mentioned above, the Subject Lands are designated ‘Mixed Use Employment’ by the in-effect Brampton Official Plan. The intent of this designation is to facilitate a range of employment-related uses and built forms. The existing structures and motor vehicle sales establishment uses are permitted.

In our opinion, the proposal complies with the applicable policies of the Brampton Official Plan, including the in-effect Airport Intermodal Secondary Plan. The variances requested are to recognize existing conditions and will not compromise the City’s development or growth management objectives. Furthermore, the proposal respects and seamlessly integrates with the

character of the surrounding community. When considered collectively and individually, the requested variances meet the general intent and purpose of the Official Plan.

The Variance Maintains the General Intent and Purpose of the Zoning By-law

As stated above, the Subject Lands are subject to By-law 270-2004 which zones it as 'Highway Commercial 1, Special Section 256 (HC1-256)'. The requested variances, organized by parcel, seek relief as follows:

Severed Lands

Reduced Parking Space Dimensions & Reduced Drive Aisle Dimensions

The purpose and intent of parking standard and drive aisle regulations is to ensure that adequate parking spaces are provided for a proposed use or combination of uses, on-street parking is minimized and sufficient, safe site circulation patterns are provided. By-law 270-2004 requires that parking spaces have a minimum dimension of 2.70 metres in width and 5.4 metres in depth and that drive aisles have a minimum width of 6.6 metres, whereas reduced parking space dimensions and reduced drive aisle widths are requested.

The requested parking size and drive aisle width reductions are technical in nature and are necessary to recognize existing site conditions. As stated above, the requested variances are triggered by the requested severance. Given the size, proposed configuration and circulation patterns of the lot, the proposed parcel is maximized leaving no space to facilitate differently sized parking spaces nor increased drive aisle widths in select locations. Additionally, the reduced parking space dimensions are requested for a selection of parking spaces across the resultant lot. Overall, the requested parking space dimensions and reduced drive aisles widths are reflective of existing conditions, which have existed without issue for decades and are sufficient to accommodate user demands.

Reduced Landscape Buffer & Front Yard Landscaping

The purpose and intent of landscape buffer and landscaped area regulations is to ensure that there will be sufficient landscaping to provide adequate stormwater drainage for the property, to ensure aesthetic consistency within the surrounding community, as well as to ensure a front yard is not visually dominated by hard surfaces. While By-law 270-2004 requires that a 4.5 metre landscape buffer be provided along the Queen Street lot line and that at least 20% of the front yard be landscaped, the resultant lot has a 4.4 metre landscape buffer width and a 4% front yard landscaping.

In this case, the requested landscape buffer width along Queen Street East and the front yard landscaping are technical in nature and are needed to recognize an existing condition.

To be clear, the current landscape buffer along the street lot line and the resultant amount of front yard landscaped area has existed in this manner for decades. In this case, the requested landscape buffer and front yard landscaping will continue to provide for permeable surfaces, proper drainage, adequate access to the lot as well as visual consistency with the surrounding community. The established front yard treatment is appropriate for the Subject Lands. It is therefore our opinion that the requested reduction to the landscape buffer along Queen Street East and the reduced front yard landscaping percentage is appropriate, will facilitate an appropriate front yard treatment, will provide for proper drainage, will not result in visual inconsistency among neighbouring properties and will not result in adverse impacts to surrounding lands.

Reduced Lot Width, Modified Buildable Areas & Increased Commercial Area

The purpose and intent of lot width, buildable area and maximum gross floor area regulations is to ensure that adequately sized lots are provided and that the amount of massing or development on a lot is appropriate. By-law 270-2004, in accordance with Special Section 256, requires that a minimum lot width of 100 metres be provided, that buildings be in accordance with a Buildable Area schedule and that the amount of commercial area be limited, whereas a reduced lot width, modified buildable area limits and increased commercial gross floor area permissions are requested.

In this case, the requested relief are technical in nature and are needed to recognize an existing condition. To be clear, the current buildable area and commercial gross floor area of the existing structure on the lot are to remain unchanged. The variances are required to recognize and legalize an existing condition, based on a modified lot fabric triggered by the severance. Furthermore, the requested reduced lot width is to recognize and implement the modified lot fabric as a result of the severance. Given the existing building and site conditions are to remain intact and unchanged, the proposal does not adversely impact the deployment of mass and scale across the Site. Therefore, the Site is not overdeveloped and there will not be adverse impacts to surrounding lands.

Retained Lands

Reduced Parking Space Dimensions & Reduced Drive Aisle Dimensions

The purpose and intent of parking standard and drive aisle regulations is to ensure that adequate parking spaces are provided for a proposed use or combination of uses, on-street parking is minimized and sufficient, safe site circulation patterns are provided. By-law 270-2004 requires that parking spaces have a minimum dimension of 2.70 metres in width and 5.4 metres in depth and that drive aisles have a minimum width of 6.6 metres, whereas reduced parking space dimensions and reduced drive aisle widths are requested.

The requested parking size and drive aisle width reductions are technical in nature and are necessary to recognize existing site conditions. As stated above, the requested variances are triggered by the requested severance. Given the size, proposed configuration and circulation patterns of the lot, the proposed parcel is maximized leaving no space to facilitate differently sized parking spaces nor increased drive aisle widths in select locations. Additionally, the reduced parking space dimensions are requested for a selection of parking spaces across the resultant lot. Overall, the requested parking space dimensions and reduced drive aisles widths are reflective of existing conditions, which have existed without issue for decades and are sufficient to accommodate user demands.

Reduced Landscape Buffer & Front Yard Landscaping

The purpose and intent of landscape buffer and landscaped area regulations is to ensure that there will be sufficient landscaping to provide adequate stormwater drainage for the property, to ensure aesthetic consistency within the surrounding community, as well as to ensure a front yard is not visually dominated by hard surfaces. While By-law 270-2004 requires that a 4.5 metre landscape buffer be provided along the Queen Street lot line and that at least 20% of the front yard be landscaped, the resultant lot has a 4.4 metre landscape buffer width and a 4% front yard landscaping.

In this case, the requested landscape buffer width along Queen Street East and the front yard landscaping are technical in nature and are needed to recognize an existing condition. To be clear, the current landscape buffer along the street lot line and the resultant amount of front yard landscaped area has existed in this manner for decades. In this case, the requested landscape buffer and front yard landscaping will continue to provide for permeable surfaces, proper drainage, adequate access to the lot as well as visual consistency with the surrounding community. The established front yard treatment is appropriate for the Subject Lands. It is therefore our opinion that the requested reduction to the landscape buffer along Queen Street East and the reduced front yard landscaping percentage is appropriate, will facilitate an appropriate front yard treatment, will provide for proper drainage, will not result in visual inconsistency among neighbouring properties and will not result in adverse impacts to surrounding lands.

Reduced Parking

The purpose and intent of parking standard regulations is to ensure that adequate parking spaces are provided for a proposed use or combination of uses and on-street parking is minimized. By-law 270-2004 requires that 158 parking spaces be provided to accommodate the existing motor vehicle sales establishment use, whereas 147 parking spaces are requested.

The requested parking reduction is technical in nature and necessary to recognize existing site conditions. As stated above, this requested variance is triggered by the requested severance. Given the size and proposed configuration of the lot, the proposed parcel is maximized leaving no space to facilitate additional parking spaces. Additionally, on-street parking is available in the surrounding area and the parking standard on the resultant lot is sufficient to accommodate user demands. The requested standard, which represents a deficiency of approximately 5.9%, is also reflective of current and evolving market conditions, whereby expansive surface parking areas to store new vehicles is no longer necessary nor an efficient and effective utilization of land.

We also highlight that the existing parking supply has existed for decades, without issue. The proposed supply of parking spaces, including tandem spaces, along the property lines is appropriate and is sufficient to accommodate user demands of the lot. We further note that given the existing site conditions and character of the surrounding area, additional surface parking spaces would create an unpleasant pedestrian environment, would negatively impact site circulation and would further reduce the provision of landscaped open space.

Based on the above, it is our opinion that the requested variance will provide for the continued use of the property for an appropriate employment-related development and will provide for an environment that is both pleasant and respects the character of the surrounding community. The general purpose and intent of the By-law regulation is maintained.

Reduced Loading

The purpose and intent of loading standard regulations is to ensure that adequate loading spaces are provided for a proposed use or combination of uses and traffic disruption is minimized. By-law 270-2004 requires that one (1) loading space per be provided to accommodate the existing motor vehicle sales establishment use, whereas 147 parking spaces are requested.

The requested parking reduction is technical in nature and necessary to recognize existing site conditions. As stated above, this requested variance is triggered by the requested severance. Given the size and proposed configuration of the lot, the proposed parcel is maximized leaving no space to facilitate additional parking spaces. Additionally, on-street parking is available in the surrounding area and the parking standard on the resultant lot is sufficient to accommodate user demands. The requested standard, which represents a deficiency of approximately 5.9%, is also reflective of current and evolving market conditions, whereby expansive surface parking areas to store new vehicles is no longer necessary nor an efficient and effective utilization of land.

We also highlight that the existing parking supply has existed for decades, without issue. The proposed supply of parking spaces, including tandem spaces, along the property lines is appropriate and is sufficient to accommodate user demands of the lot. We further note that given the existing site conditions and character of the surrounding area, additional surface parking spaces would create an unpleasant pedestrian environment, would negatively impact site circulation and would further reduce the provision of landscaped open space.

Based on the above, it is our opinion that the requested variance will provide for the continued use of the property for an appropriate employment-related development and will provide for an environment that is both pleasant and respects the character of the surrounding community. The general purpose and intent of the By-law regulation is maintained.

Modified Buildable Areas & Increased Commercial Area

The purpose and intent of buildable area and maximum gross floor area regulations is to ensure that the amount of massing or development on a lot is appropriate. By-law 270-2004, in accordance with Special Section 256, requires that buildings be in accordance with a Buildable Area schedule and that the amount of commercial area be limited, whereas a modified buildable area limit and increased commercial gross floor area permissions are requested.

In this case, the requested relief are technical in nature and are needed to recognize an existing condition. To be clear, the current buildable area and commercial gross floor area of the existing structures on the lot are to remain unchanged. The variances are required to recognize and legalize an existing condition, based on a modified lot fabric triggered by the severance. Given the existing building and site conditions are to remain intact and unchanged, the proposal does not adversely impact the deployment of mass and scale across the Site. Therefore, the Site is not overdeveloped and there will not be adverse impacts to surrounding lands.

Reduced Landscape Buffer

The purpose and intent of landscape buffer regulations is to ensure that there will be sufficient landscaping to provide adequate stormwater drainage for the property, to ensure aesthetic consistency within the surrounding community, as well as to ensure a yard is not visually dominated by hard surfaces. While By-law 0225 – 2007 requires that a 4.5 metre landscape buffer be provided along a lot line that is a street line and a 3.0 metre landscape buffer be provided along a lot line that abuts a Commercial Zone property, a 1.76 metre landscape buffer along a street line is requested, a 1.33 metre landscape buffer along the

southern lot line abutting a Commercial Zone area and a 0.0 metre landscape buffer along a (eastern) lot line abutting a Commercial Zone area.

In this case, the requested landscape buffer along a street line is technical in nature and is needed to recognize an existing condition. To be clear, the current landscape buffer along the street lot line has existed in this manner for decades. In this case, the requested landscape buffer will continue to provide for permeable surfaces, proper drainage, adequate access to the lot as well as visual consistency with the surrounding community. The established front yard treatment is appropriate for the Subject Lands. It is therefore my opinion that the requested reduction to the landscape buffer along a street lot line is appropriate, will facilitate an appropriate front yard treatment, will provide for proper drainage and will not result in visual inconsistency among neighbouring properties.

A reduced 1.33 and 0.0 metre landscape buffer, respectively, along a lot line abutting a Commercial Zone is also requested. In this case, the requested landscape buffer widths are measured along the lot's southern and eastern property lines. The requested reduced landscape buffer is to technical in nature and is needed to recognize an existing condition that has existed in this manner for decades. The requested landscape buffer will continue to provide for permeable surfaces, proper drainage, adequate access to the lot as well as visual consistency with the surrounding community. The established landscape treatment is appropriate for the Subject Lands. It is therefore my opinion that the requested reduction to the landscape buffer along the southern and eastern property lines are appropriate, will provide for proper drainage and will not result in adverse impacts to surrounding lands.

The Variance is Desirable for the Appropriate Development or Use of the Land

The variances arising from the proposed consent are technical in nature and will allow for the creation of an additional industrial lot to be held in separate ownership. Furthermore, the requested variances will maintain appropriate built forms, heights and massing that will preserve the character of the surrounding Employment Area community.

Overall, it is our opinion that the proposed variances are required to facilitate the existing structures and site conditions, while also are in keeping with the existing character of the Subject Lands and the surrounding community. As such, the proposal will not negatively affect surrounding uses and represents efficient, compatible and appropriate development that is desirable.

The Variance is Minor in Nature

The requested variances will permit the existing structures to be held in separate ownership and existing site conditions to remain intact. Furthermore, the variances required do not represent overdevelopment as they will recognize existing structures and existing site conditions. Overall,

the variances requested will not result in adverse impact on adjoining properties or the surrounding community. Collectively and individually, it is our opinion that the variances are minor in nature.

CONCLUSION

As described above, the requested variances arising from the Consent Application satisfy the four tests of Section 45(1) of the *Planning Act* and represent good planning. Additionally, the criteria of Section 51(24) of the *Planning Act* was considered in preparation of the Consent Application and in this regard, the criteria has been satisfied. We trust this is helpful.
