Innovation and Development

One of the Core Values of the Corporation of the City of Brampton is excellence in service delivery. Our staff are always seeking new and improved processes to innovate and enhance our ability to produce results.

The Accessible Enforcement Officer position was selected to field test and implement a portable printer, which provides the capability of printing Orders and other enforcement paperwork in the field, rather than returning to the office to generate forms.

In addition to this, further enhancements have been implemented to track seized permits as well as property inspections, to allow for greater collection and recall of data.

Finally, the Accessible Enforcement Officer has provided training to the new recruit Enforcement Officers as part of their onboarding and initial training program.
