**Subject:** Correspondence - Brampton School Traffic Safety Council - December 5, 2024

Good day,

The BSTSC is considering installing speed bumps or pedestrian crossing in front of Sunny View Middle School to improve safety.. The Automated Speed Enforcement camera has been installed on Chapparal Drive in front of the school and has been active since November 6, 2024. Traffic calming devices such as speed cushions are not installed in conjunction with ASE because their implementation would have negative impacts on this type of speed mitigating measure. Furthermore, installation of one category of speed mitigation measures allows for improved distribution of resources throughout the city. Based on the above, staff does not recommend installation of speed cushions along Chapparal Drive.

Traffic operations will conduct pedestrian crosswalk (PXO) study when weather permits and will share results to determine whether PXO is warranted or not.

Kind regards,

**Devang Patel (He/Him)**
