

Hi Steve and Fernanda,

I hope you are both doing well.

I want to bring your attention to a youth event being held in Brampton next month related to the environment and active transportation. It is being organized by Brampton Biosphere Eco-city, a youth led volunteer initiative aimed at making Brampton a sustainable city.

The event is a speaking contest where secondary school students research and deliver a speech about an environmental issue they are passionate about. This year's contest theme is about sustainable transportation. The contest will be held on Thursday April 24, 6:00pm at Brampton City Hall in the West Tower.

The contest is open to all Brampton secondary school students.

Students interested in participating in the contest should contact, clarissa@bioecocity.org. Those interested in attending the event can purchase tickets through [Eventbrite](#).

Please help promote this event which is being supported by the City of Brampton.

Sincerely,

David Laing
