

Report Committee of Adjustment

Filing Date: April 23rd, 2025

Hearing Date: May 27th, 2025

File: A-2025-0043

**Owner/
Applicant:** Planchet Ambler Inc. c/o Howard Glowinsky
RLG Systems Canada Inc.

Address: 30 Delta Park Blvd

Ward: WARD 8

Contact: Marcia Razao, Planner I

Recommendations:

That application A-2025-0043 is supportable, subject to the following conditions being imposed:

1. That the extent of the variance be limited to that shown on the sketch attached to the Notice of Decision;
 2. The owner to obtain a building permit for any alterations to the building prior to occupancy of the units.
 3. The applicant shall be responsible to comply with all applicable legislations, statutes, codes and by-laws related to the proposed operations. All required permits/approvals/licenses shall be obtained prior to the site being operational;
 4. That the waste being transferred and/or processed on-site shall be strictly limited to non-hazardous waste;
 5. That failure to comply with and maintain the conditions of the Committee shall render the approval null and void.
-

Background:

Existing Zoning:

The property is zoned 'Industrial Four Special Section 1557 (M4-1557)', according to By-law 270-2004.

Requested Variance:

The applicant is requesting the following variance:

1. To permit a waste transfer/ processing station, whereas the By-law doesn't permit the proposed use.

Current Situation:

1. Maintains the General Intent and Purpose of the Official Plan

The property is designated 'Industrial' in the 2006 Official Plan and 'General Employment 1' in the Airport Intermodal Secondary Plan (Area 4). The subject property is designated as 'Employment Areas' (Schedule 1A – City Structure) and 'Employment' (Schedule 2 – Designations) in the Brampton Plan. On May 16th, 2024, the Region of Peel formally issued a notice of approval with modifications for the City of Brampton's new Official Plan, known as the 'Brampton Plan.' The Plan was scheduled to take effect on June 6th, 2024, except for any sections that may be subject to appeal. Schedules 1A and 2 have been appealed on a city-wide basis and therefore the 2006 Official Plan designations are in effect until the appeal is resolved.

A range of ancillary uses can be supported within Official Plan designation that are considered 'Industrial', uses such as manufacturing, processing, repair and service, warehousing and distribution these uses are supportable without negatively impacting the viability of employment lands or employment operations. The 'General Employment 1' designation within the Airport Intermodal Area Plan permits, warehousing, manufacturing and processing within this zone. Additionally, the surrounding area is designated General Employment 2 which permits the use of waste processing and transfer stations. Brampton Plan 2023 designates the lands as 'Employment Areas' which permits manufacturing, warehousing, research and development, office uses, logistics and other ancillary industrial uses. The requested variance is not considered to have significant impacts within the context of the Official Plan. The nature and extent of the proposed variance is considered to maintain the general intent and purpose of the Official Plan

2. Maintains the General Intent and Purpose of the Zoning By-law

The variance is requested to permit a waste transfer/ processing station, whereas the By-law doesn't permit the proposed use. The property is zoned 'Industrial Four (M4-1557)', a zone which does not specifically allow waste transfer/ processing station however, the zone does include several industrial uses such as manufacturing and assembly of clothing, printing, and a number of light manufacturing uses. City staff have reviewed the variance and have no objections or concerns. A condition of approval is recommended that the owner obtain a building permit for any alterations to the building prior to occupancy of the unit which will further address matters associated with the change of use. Subject to the recommended conditions of approval, the variance maintains the general intent and purpose of the Zoning By-law.

3. Desirable for the Appropriate Development of the Land

The variance is requested to permit a waste transfer/ processing station, whereas the By-law doesn't permit the proposed use. Existing industrial areas will continue to adapt to changing markets, redevelop and intensify as there are shifts within the economy at a local level. A condition of approval is

recommended that the owner obtain all necessary licenses and approvals to operate a waste transfer/ processing station ensuring all environmental aspects are mitigated and surrounding land is not impacted. The proposed use is not anticipated to have a significant impact on the overall function of the property given its proposed scale. Subject to the recommended conditions, the variance is considered to be desirable for appropriate development of the land.

4. Minor in Nature

The variance is requested to permit a waste transfer/ processing station is considered to be minor in nature due to its limited scope and lack of significant impact on the surrounding uses or the broader community. The use will be introduced in an existing building, there is no changes to the exterior to the building and the site has sufficient parking to accommodate the change. Subject to the recommended conditions of approval, the variance is considered to be minor in nature.

Respectfully Submitted,

Marcia Razao
