Dear City of Brampton Official(s),

I am writing to voice my strong opposition to the proposed BARIC development. As a resident of this neighbourhood, I am deeply concerned about the negative effects this project could have on our already overburdened community resources, including roads, public safety, and overall quality of life.

In particular, I am worried about the issue of overflow parking, which could further strain our streets and create additional challenges for residents. The proposed 141 parking spaces—even if all are available on a given day—are insufficient for a religious facility, which typically attracts large gatherings. This limited parking capacity is likely to result in overflow parking on nearby streets, creating significant inconvenience and chaos for local residents trying to access their own neighbourhood.

My residence is located at [REDACTED], directly opposite the proposed site. I have already noticed an increase in unauthorized parking and stopping by taxi drivers (including rideshares), driving school instructors, and others. This new development will only exacerbate these issues, as there is currently no effective enforcement by the city to address overflow parking in the area.

City planning officials must recognize that such developments are unsuitable for our neighborhood because of the negative impacts they would have on traffic, noise pollution, and overall density. Approving this amendment would undermine the careful planning that has gone into preserving the livability and sustainability of our community.

In summary, I urge you to reject this proposal and to carefully consider the long-term impacts it will have on our entire community. Thank you for your attention to this important matter.

Please consider this letter as my authorization to include my response in the city file and public record regarding this issue.

Please include me in list to receive further updates on this file#, including Recommendation Report. If I need to fill in delegation form, please share information on the same.

Regards,

Deep Patel
