Re: Letter of Support regarding the Community Energy and Emissions Reduction Plan and Institute for Sustainable Brampton

The City of Brampton has demonstrated its commitment to becoming a Green City by declaring a climate emergency, developing a Community Energy and Emissions Reduction Plan (CEERP), working in partnership with the Region of Peel and Sheridan College to establish an Institute for Sustainable Brampton (ISB) and joining the Global Covenant of Mayors for Climate and Energy.

The Johnson Controls organization has enjoyed a partnership with the City of Brampton over the past year as a member of its Community Energy and Emissions Reduction Plan Task Force. We believe that this important initiative contributes to our shared goals for reducing community energy use, reducing Greenhouse Gas emissions and retaining energy costs within the city. We congratulate the City for embarking on this city-wide program to advance Brampton's energy transition to a future of clean, sustainable, resilient energy that supports the Brampton 2040 Vision.

This letter expresses the support of Johnson Controls Canada to continue working with the City and its partners to achieve the goals of the Community Energy and Emissions Reduction Plan, including towards the establishment of the proposed Institute for Sustainable Brampton. Pending Council approval of the CEERP and ISB, we will determine resources that we can allocate towards the implementation of this plan and we will continue to explore opportunities for greater commitment, which could possibly include in-kind and/or financial support. As a leading Energy services company (ESCO), and a leader in global energy efficiency and sustainability, we hope to share some of the advanced partnering models we have made commercially viable that may contribute to the desired outcomes.

We recognize that the CEERP has value and we are excited to continue to work with the City and its partners to meet our Climate Emergency and Brampton's commitment to be a Green City.

Supervisor of Environmental Planning
City of Brampton

Dear Mike,

Re: Letter of partnership for the Community Energy and Emissions Reduction Plan

On behalf of Enbridge Gas Inc. ("Enbridge Gas"), I am pleased to provide a letter of partnership for the City of Brampton's Community Energy and Emissions Reduction Plan (CEERP).

The creation of the Community Energy and Emissions Reduction Plan is a terrific milestone enabling the City of Brampton to:

- assess broader Municipal energy use and greenhouse gas emissions
- identify opportunities to conserve
- improve energy efficiency and reduce future greenhouse gas emissions
- consider the impact of future growth and options for local clean energy generation, fuel switching and storage; and
- support local economic development

Enbridge Gas has enjoyed its partnership with the City of Brampton – especially over the past year as a member of your Community Energy and Emissions Reduction Plan Task Force. With more than 20 years' experience in energy conservation we share the city's goal of reducing energy use and greenhouse gases.

This letter expresses Enbridge's support and commitment to continue to work with the City and its partners to achieve the goals of the CEERP including the establishment of the proposed Institute for Sustainable Brampton. Pending Council approval of the CEERP and ISB, we will determine what resources and/or financial support we can allocate towards the implementation of this plan.

We recognize that the CEERP has value and we are excited to collaborate with the city and its partners to reach our shared climate and energy conservation goals.

Yours truly,

Chris Hamilton

Re: Letter of support regarding the Community Energy and Emissions Reduction Plan and Institute for Sustainable Brampton

The City of Brampton has demonstrated its commitment to becoming a Green City by declaring a climate emergency, developing a Community Energy and Emissions Reduction Plan (CEERP), working in partnership with the Region of Peel and Sheridan College to establish an Institute for Sustainable Brampton (ISB) and joining the Global Covenant of Mayors for Climate and Energy.

As past Chair of the Brampton Environment Advisory Committee, past Chair of the Institute for Sustainable Brampton Task Force, Chair of BikeBrampton, member of the TRCA Regional Watershed Alliance, member of Sierra Club Peel Chapter, and a long-time Brampton resident, I have enjoyed a partnership with the City of Brampton over the past year as a member of its Community Energy and Emissions Reduction Plan Task Force. I believe that this important initiative contributes to our shared goals for reducing community energy use, reducing Greenhouse Gas emissions, and retaining energy costs within the city. I congratulate the City for embarking on this city-wide program to advance Brampton's energy transition to a future of clean, sustainable, resilient energy that supports the Brampton 2040 Vision.

This letter expresses my support and commitment to continue working with the City and its partners to achieve the goals of the Community Energy and Emissions Reduction Plan, including the establishment of the proposed Institute for Sustainable Brampton.

Pending Council approval of the CEERP and ISB, I will determine in-kind resources that I can allocate towards the implementation of this plan.

The implementation of the CEERP is a vital component of the City's plan for economic and environmental sustainability. I am excited to continue to work with the City and its partners as we tackle the declared climate emergency and fulfil Brampton's commitment to be a Green City.

Regards,

**Re: Letter of Support regarding the Community Energy and Emissions Reduction Plan
and Institute for Sustainable Brampton**

The City of Brampton has demonstrated its commitment to becoming a Green City by declaring a climate emergency, developing a Community Energy and Emissions Reduction Plan (CEERP), working in collaboration with the Region of Peel and Sheridan College to establish a framework for an Institute for Sustainable Brampton (ISB) and joining the Global Covenant of Mayors for Climate and Energy.

The Region of Peel has been working with the City of Brampton over the past year as an invited member of its Community Energy and Emissions Reduction Plan Task Force. This important initiative contributes to our shared goals for achieving Complete Communities within the Region of Peel, including increased energy efficiency, reducing Greenhouse Gas emissions and expanding green infrastructure. The CEERP also aligns with several Regional plans, strategies and priorities, including the Region's Climate Change Master Plan, Sustainable Transportation Strategy, Regional growth management planning and policies, and 2018 – 2022 Term of Council Priority *Build Environmental Resilience*.

This letter expresses the support of the Region of Peel to continue working with the City and its community stakeholders to achieve the goals of the CEERP, including further review of how the ISB could be established. Another important role the Region will play is bringing the goals, planning efforts and phased implementation of the CEERP and future ISB to the attention of the Peel Climate Change Partnership (PCCP), which was endorsed by Regional Council in February 2020. The PCCP has a broader mandate than the proposed ISB but has synergistic emissions reduction priorities. The City of Brampton is a member of the PCCP as are Peel Region, City of Mississauga, Town of Caledon and the Conservation Authorities.

Pending City Council approval of the CEERP and ISB, Regional staff from the Office of Climate Change and Energy Management, acting as Secretariat for the PCCP, can help ensure the transfer of knowledge and innovation stemming from the ISB flows seamlessly to the PCCP, fostering opportunities and efficiencies to scale energy technologies or programs that accelerate the region-wide transformation to low carbon, resilient communities.

The Region recognizes that the CEERP has value and is pleased to continue to work with the City of Brampton and its community stakeholders to meet shared outcomes that collectively support a low carbon and resilient Community for Life.

Re: Letter of support regarding the Community Energy and Emissions Reduction Plan and Institute for Sustainable Brampton

The City of Brampton has demonstrated its commitment to becoming a Green City by declaring a climate emergency, developing a Community Energy and Emissions Reduction Plan (CEERP), working in partnership with the Region of Peel and Sheridan College to establish a Centre for Community Energy Transformation (CCET) and joining the Global Covenant of Mayors for Climate and Energy.

Toronto and Region Conservation Authority (through the Partners in Project Green program) has enjoyed a partnership with the City of Brampton over the past year as a member of its CEERP Task Force. We believe that this important initiative contributes to our shared goals for reducing community energy use, reducing Greenhouse Gas Emissions and retaining energy costs within the city. We congratulate Brampton for embarking on this city-wide program to advance an energy transition to a future of clean, sustainable, resilient energy that supports the Brampton 2040 Vision.

This letter expresses the support of Partners in Project Green (PPG) to continue working with the City and its partners to achieve the goals of the Community Energy and Emissions Reduction Plan, including the establishment of the proposed Centre for Community Energy Transformation.

Pending Council approval of the CEERP and CCET, we will allocate resources towards the implementation of this plan, with staff support valued at \$1,000. Additionally, we will continue to explore opportunities for greater commitment.

We recognize that the CEERP has value and we are excited to continue to work with the City and its partners to meet our Climate Emergency goals and Brampton's commitment to be a Green City.

Re: Support for the Community Energy and Emissions Reduction Plan and Institute for Sustainable Brampton

Dear Michael,

We applaud the steps City of Brampton has taken to establish itself as a global leader on climate action. Over the past few years, Brampton has declared a climate emergency, developed a Community Energy and Emissions Reduction Plan (CEERP), and joined the Global Covenant of Mayors for Climate and Energy.

We are proud of the partnership between our organizations that engendered the Community Energy Emissions Reduction Plan Task Force. Together we have articulated a vision and action plan to transform Brampton's energy-intensive structures into clean, sustainable, resilient systems that underpin the Brampton 2040 Vision. We believe this community-derived approach to shared goals for a smart energy future is crucial to ensuring the ongoing participation of the entire community as we work through the challenges of implementation.

We are proud to continue partnering with the City of Brampton and Region of Peel to establish and guide the Institute for Sustainable Brampton, which will be an important catalyst for leveraging our community's social and financial capital to undertake the major projects required for transformation at this scale.

Thank you for being such a supportive and engaged partner, and we are excited to embark on this next phase with you.

Regards,

Herbert Sinnock
Director, Sustainability
The Sheridan College Institute of Technology and Advanced Learning
