Subject - Proposal to identify and protect a corridor of land for future electricity infrastructure within and adjacent to the Parkway Belt West Plan Lands
[ERO Posting 026-0347](#)

Dear Sir/Madam,

On behalf of the City of Brampton, we appreciate the opportunity to provide comments on the proposed changes outlined in ERO 026-0347.

The Ministry of Energy and Mines (MEM) has been engaged with City-staff on the study evaluating the corridor of land within and adjacent to the Parkway Belt West area to determine the land area required for future transmission infrastructure. The City will continue to participate as it relates to lands within the City's jurisdiction, and recognizes that the Parkway Belt West Plan area can be protected for critical infrastructure through the Provincial Planning Statement, 2024.

There are some identified lands located outside of the Parkway Belt West Plan area, which are minimal in scope and have limited impact or concern. Staff look forward to continuing involvement on the project and support the study aims, including co-location of linear infrastructure and minimizing impacts to the natural heritage system. The City will remain actively involved throughout the study to evaluate any risk or concerns related to lands as part of the study.

Thank you for the opportunity to provide comments on these proposed changes.

Sincerely,

Steve Ganesh, MCIP, RPP
Commissioner
Planning, Building and Growth Management
City of Brampton
