FW: [EXTERNAL]5G Concerns

From: Monica Nikopoulos**Sent:** 2021/04/24 8:06 AM**To:** Pacheco, Sonya**Subject:** Re: [EXTERNAL]5G Concerns

Dear Sonya,

I greatly appreciate that you kept me in mind to inform me of the upcoming meeting! I'm not currently prepared for a delegation however, I hope it's not too late to add the following links to the agenda in kind:

While these are US or EU based/studies, they apply exactly to Canada as our current regulations and standards are the same as US, relying on studies conducted prior to 1980.

Informed health and environmental effects of 5G and those who are hyper sensitive to RF need to be taken into account as the city is liable for any legal actions, as 5G installations are exempt from liability.

Please note that those city officials living and working within the 5G radius, especially the towers (and schools) will also be subject to the long term effects of RF and to monitor their health continually.

If you remember, I'd also greatly appreciate a link to the tapped version of the delegation when available as I'll be out of town on that date and won't be able to view it live.

Thank again Sonya!! You're an Angel!!

Blessings!
