Hello Sir,

Received the notice regarding the above Ref, in the subject line.  
I might not be able to join the meeting due to work commitments.

However this is a general concern about **multiple** construction projects around my home at

Please have consideration of the amount of dust and particulate matter generated by the digging of soil and construction materials. It's been already hard with Covid-19 that we have to wear masks indoors but now we cant even go out without a mask.

My balcony is full of dust...i have to clean every other day...and I am even scared to use the balcony as i'm concerned that all that dust is landing in my lungs.

My earnest request is to please have consideration for people living in this area and **pause construction in the summer to allow the inhabitants of this area to breathe easy outdoors at least** .

Alternatively the construction companies have to manage their dust and particulate matter.

I really hope my humble request will be considered.

Thank you.  
Kind regards,

Amrita Doongoor

To: City of Brampton  
Attn: Himanshu Katyal, Development Planner

Hello Himanshu,

My name is Cuong Pham and I am a resident at \_\_\_\_\_ and would like to contribute some thoughts to the Public Meeting about the new subdivision at 10675 Mississauga Road. Firstly, it is a big surprise to me about the city plan to convert 10675 Mississauga Road to a Townhouse subdivision. When we bought my house, the builder never inform us about this possibility in the master plan. If I have a choice, I would prefer to keep it as it is as the density is already very high at this area with all existing townhouses and condos and others that are being built in very near future. Otherwise, could we make the new subdivision a mix of Singles, Semi and townhouses similar to other nearby planned sub divisions (instead of 100+ only townhouses). Also, I would suggest to add a small park in the plan for the benefits of residents in this new sub division and nearby.

Please help bring my comments to the public meeting and wish we will have a great outcome to make Brampton a better city.

Thank you.

Best regards,

Cuong Pham
