**IMPROVING OUR ROADS**

A close-up photograph of a mechanical assembly. A large, weathered metal gear with several teeth is visible on the left. A metal link is connected to the gear's teeth. This link has a curved shape and a small circular hole at one end. A purple roller or bush is mounted on this hole. The metal surfaces are dark, rusty, and show signs of wear. The lighting is dramatic, with strong highlights and deep shadows.
