Hello,

I received notice of the virtual meeting "proposal" for development of soccer fields and a new community centre. Is this how the city does business? You destroy existing 30 year-old trees, clear the land and plant new trees, and lay down sod over a 4+ month period, and then ask the community for approval?!!

I started calling about this in June speaking to the offices of our two ward Councillors and a City planner. My concern was the devastation of beautiful evergreens that I've watched grow over the past 23 years. After being passed around from one committee to another, I contacted the Peel Board of Trustees for this Ward. Some environmental manager with the BOT had his assistant contact me to explain that September is a busy month for them and I haven't heard another word.

I am all for city improvements but believe that someone dropped the ball on this. I realize that nothing can be done now, but the way this entire project has been pushed through and NOW you ask for approval is laughable.

Yours truly,

Judy McClelland
