Dear Committee of Council,

Re: Centre for Community Energy Transformation (CCET) Support Letter

On behalf of Enbridge Gas Inc. ("Enbridge"), I am pleased to provide this letter of support for the CCET Report on the Committee of Council agenda on February 2, 2022.

Identified as a catalytic action in the Brampton 2040 Vision, the CCET is being established to help the City of Brampton accelerate the implementation of its Community Energy and Emissions Reduction Plan (CEERP).

Enbridge has been an active member of the CCET Advisory Task Force (ATF) since its inception and been recognized by city staff for the invaluable insight and advice provided in moving CCET forward. We have appreciated the opportunity to participate and provide feedback into this important initiative.

There is a transition occurring towards a low carbon future and it has created opportunities for collaboration and true leadership in addressing climate change in ways that are innovative, integrated, economic, and effective. CCET is poised to be a forum through which many such opportunities can be realized.

Given our scale and experience, Enbridge is uniquely positioned to be a partner to CCET and the City of Brampton on low carbon solutions, through our diverse energy offerings, across multiple markets that improve energy efficiency and lower emissions. These solutions include conservation programs; low carbon heating technologies such as geothermal loops, heat pumps and hybrid heating systems and solar photovoltaic (PV); cleaner technologies for transportation; and green fuels like renewable natural gas and hydrogen.

Many of our employees also live and work in the City of Brampton and we know climate change action matters to them. We are committed community partners with a vested interest in the City's livability, quality of life and low carbon future.

We applaud the City of Brampton, Region of Peel, Sheridan College, and fellow members of the CCET ATF for their leadership and look forward to continuing our collaborative efforts through CCET, to further our mutual and collective climate and energy objectives in support of a cleaner, greener future.

Sincerely,

A handwritten signature in cursive script that reads "Sarah Van Der Paelt".
