**Subject:** Waste Collection Agreement for City of Brampton Facilities

**Contact:** Dale Turpin, Acting Supervisor, Operations and Service Contracts  
905-874-2496 Dale.turpin@brampton.ca

**Report Number:** Public Works & Engineering-2022-599

**Recommendations:**

1. That the report titled: Waste Collection Agreement for City of Brampton Facilities of the Committee of Council Meeting of June 08, 2022 be received; and
2. Council authorization be obtained to enter into a waste collection agreement between the Region of Peel and the City of Brampton for municipal facilities

**Overview:**

- The purpose of this report is to obtain Council authorization to enter into a waste collection agreement between the Region of Peel and the City of Brampton for municipal facilities. If executed, the waste collection agreement will renew annually for successive one-year periods providing both parties with the flexibility to make amendments regarding any service delivery or program changes.

**Background:**

The Region of Peel provides waste collection and disposal services to the Cities of Brampton and Mississauga and Town of Caledon (the local municipalities) at no charge. The services include the collection of waste from municipal facilities such as City and Town Halls, recreation centres, fire stations and libraries and permitting the local municipalities to deliver waste to designated Regional facilities, including the Peel Integrated Waste Management Facility on Torbram Road. Currently there is no formal agreement between the City of Brampton and the Region of Peel that outlines each parties' responsibilities regarding waste collection and disposal.

## **Current Situation:**

Staff from the Region have been working with staff from the City of Brampton to develop a waste collection agreement similar to agreements that are currently being executed with the City of Mississauga and the Town of Caledon. The waste collection agreement between the Region and the City of Brampton outlines both parties' responsibilities in regards to waste management and includes a list of City of Brampton facilities where Regional collection is provided (including collection frequency), identifies key contacts for waste management inquiries and commits the Region to provide the City of Brampton with tonnage reports and up-to-date waste management educational material.

Under the Region's Document Execution By-law, the Commissioner of Public Works has delegated authority to sign the agreement as authorized by the Region's Waste Collection By-law 35-2015, as amended. Therefore, the Region's Commissioner of Public Works will sign the agreement along with the City of Brampton's Commissioner of Public Works in order to execute and formalize the agreement. Once executed, the waste collection agreement will renew annually for successive one-year periods providing both parties with the flexibility to make amendments regarding any program changes, such as the transition of the blue box program to full producer responsibility.

## **Corporate Implications:**

### Financial Implications:

There are no financial impacts resulting from the waste collection agreement as the Region already provides these waste collection and disposal services to the City of Brampton at no charge.

### Legal Implications:

Legal Services will support Operations in the negotiation and drafting to finalize agreement with the Region.

## **Term of Council Priorities:**

Term of Council Priorities are the steps to move our city towards that goal over the next four years. Brampton is a Well-Run City Continuously improving the day-to-day operations of the corporation by streamlining service delivery, effectively managing municipal assets, and leverage

Living the Mosaic – 2040 Vision

This report aligns with the 2040 Vision by streamlining service delivery and effectively managing municipal assets as a well-run city.

**Conclusion:**

Region of Peel and City of Brampton staff worked together to develop a waste collection agreement that documents the waste collection and disposal services provided to City of Brampton facilities. The waste collection agreement outlines both parties' responsibilities regarding waste management and supports the Region's waste diversion target of 75 percent by 2034.
