To whom it may concern

The mall at Vodden and Kennedy has applied to develop the property.

There are many in the area that have issues with this development. The area has too much traffic congestion now. Allowing this will make it worse. Many seniors and others depend on the mall for shopping. They walk and do not drive a lot of them. The area is dense in population and the crime is up . Many people have lived in the homes in the surrounding area since their homes were built.

Public transit is always being encouraged and walking instead of driving in Brampton yet this will cause many people to have to drive more.

I would like to know how we can protest the building of these buildings?

I look forward to hearing from you.

Michelle Sewell
