

EcoTank

AN INNOVATIVE AND ECO-FRIENDLY SOLUTION FOR REFILLING WINDSHIELD WASHER FLUID

ecological

user
friendly

easy
installation

Benefits

- ⊕ Easy installation without any complicated construction work (no down time).
- ⊕ No operator assistance required. Customer convenient solution.
- ⊕ No hazardous spillage.
- ⊕ Better inventory control (see per litre In real time sales, great data opportunity).
- ⊕ Environmental commitment can help brand.
- ⊕ Washer Fluid and Air combo unit available with Air-Serv JV (electric vehicles only require air and washer fluid for regular maintenance).
- ⊕ Quantifiable results with plastic jug counter (see how many jugs are getting diverted from landfills).

The Difference One Tank Makes

One V3 Tank
Eliminates 58
Washer Fluid Jugs

- Subtracting trailers, mopeds, and motorcycles, there are **35,006,196** registered vehicles in Canada.
- Assume every vehicle buys one carton, that is **35 million jugs** in the landfills per year.
- Since 1950, only **9%** of the world's plastic has been recycled.*
- Contaminated cartons much like the methanol in washer fluid containers, won't be recycled.
