Hello Brampton City development team,

Is it not the hypocrisy of city that at one side city target is to plant 1 million tree and at other hand its ready to cut the thousands of mature trees?

Please show some honesty towards the environment and wild animals. The site of proposed development (OZS-2022-0021) is full of mature trees and is a house of thousands of birds & animals...cutting the trees will not only destroy the environment but also force the birds and animals to flee from this site.

By the grace of city development team this area already lost large amount of trees.. its time to put a full stop. We understand new development of houses is important but that should be on plain land not at this site and not at the loss of animal, birds and environment. City like Caledon, Richmond hill , or Oakville would have rejected this kind of proposal at first place .. but don't know why City of Brampton allowing all kind of ill practices.

Community in this area will escalate the matter to Mayor and city council and if found they are also involved then ready to file a petition in the court.

so please cancel the proposed development plan and show some responsibility towards the environment.

Thanks,
Rajiv Kumar
