To whom it may concern

I am writing with concern to the zoning at 227 Vodden St. This is already a busy area with frequent accidents at Kennedy and Vodden.

I understand the need for housing; however, this area was not built to accommodate this much growth.

What about the existing people in the neighborhood how were they considered, where is the addition schools and parks being planned to accommodate all these people?

This is also the only grocery store in the immediate area. Streets in this area still use yield signs instead of stop sign, this will all have to change to accommodate traffic.

In considering this project what benefits will it bring. More people will be put at risk with the increase of traffic in this small neighborhood.

Thank you in advance for your consideration

I am also interested in being updated with the final decision in this matter
