i am concerned about the following:

noise from 7:30 am to 7 pm 6 days a week,, the extra dust getting into our apts, lack of parking for the trades digging the foundation and the building structure,,traffic density on john street after 39 story build goes up and is rented out to 250 students,lack of sun light to 16 john,this will be a safety issue for our oldest seniors. do we have a detailed plan for the whole block--main and queen over to chapel street--so we can see what the whole block will look like

john
