Based on the current information the Planning Committee is urged to recommend to Council that heavy truck access NOT be permitted on the Gore Road. Permitting the heavy truck access on the Gore Rd effectively turns it into an industrial connector road which is NOT in keeping with the Peel Road Characterization Study (RCS).

The Peel Road Characterization Study (RCS) classifies Gore Rd as suburban connector road from Hwy 50 to Castlemore. Redesignation of roadways cannot happen by default. Road characterization cannot be re-classified until such time the RCS is updated or through the 2051 Transportation Master Plan.

The residents most definitely plan to discuss our concerns if changes are proposed in the Master Plan for the classification of Gore Road. For now, the PIC for the 2051 Transportation Master Plan have been postponed. Based on the current situation it would be premature to permit a heavy truck access on the Gore Road.
