

Council Meeting Re Rezoning Queen Street West

February 13, 2023

Thank you councillors for your time. I am out of town and respectfully submit my position via this email to oppose high rise development in the Springbank Hamlet.

- HIGH DENSITY makes a mockery of your Development Guidelines
- HIGH DENSITY will destroy the rural setting of the Springbank Hamlet
- HIGH DENSITY will irreversibly harm the ecology
- HIGH DENSITY will cause traffic congestion not envisaged because the combined effect of ALL the developments has not been assessed
- Consultation process has lacked transparency; checked the box but totally missed the intent of the process

You have been getting dozens of presentations OPPOSING HIGH DENSITY development on Queen & Mississauga Rd.

Several of your constituents have personally told you, before and today that they OPPOSE HIGH DENSITY Development

Hundreds of your constituents have sent you petitions OPPOSING HIGH DENSITY Development

Who are you Accountable to, Mr. Mayor and Councillors? I suggest the residents. They are telling you repeatedly and loudly that you should REJECT HIGH DENSITY development along Queen Street and Mississauga Rd and James Potter.

If you don't listen to the residents, who do you listen to?

Is Integrity and Accountability important to you? Then

You must reject HIGH DENSITY Development at Queen W and Mississauga/ James Potter TODAY.

Respectfully,

Amrik S. Ahluwalia
