Re: APPLICATION #A-2023-0010 WARD #3

Good afternoon

Please take note that I am completely opposed to the above Committee of Adjustment application as noted above. The home currently located at #9 Blackmere Cir has been doubled in footprint since it was originally built in 1985. The home has been an eye-sore in the neighborhood and any additional changes must not be allowed. The home has oversized garage doors as the home owner operates a business out of this location. Parking or storing oversized vehicles would detract from the esthetics of the neighborhood. This area is a residential community with single family homes and should not be turned into a commercial zone. I have been a resident across the street from this home for over 36 years.

Again, I am opposed to this application.

This information can become public record and shared with the City of Brampton employees who are accountable to this application and whom you deem necessary.

Thank you
