Whereas historically, traffic signals are designed to assign right of way to vehicle and pedestrian movements at an intersection with the objective to balance demand, minimize delay and provide the necessary information for all users to safely navigate through the intersections; and

Whereas the City of Brampton prioritizes pedestrian safety in support of Vision Zero and active transportation; and

Whereas pedestrian crossing times are the basic building blocks of intersection signal timings and determine the rest of the traffic signal phasing; and

Whereas most intersections require pedestrians to use the “push button” to activate the pedestrian walk signal; and

Whereas at traffic signals that change without the corresponding walk signal, pedestrians will oftentimes risk their own safety to save time and cross anyways; and

Whereas the requirement of a pedestrian to push a “push button” shows that intersections are prioritizing vehicular traffic over pedestrian traffic;

Therefore Be It Resolved:

That staff report back on the implementation, including any associated costs, of having all intersections automatically display the walk signal between 6:00 am – 11:59 pm including the possibility of a phased in approach beginning in pedestrian heavy areas.
