

2023 updates

Cabin tour May 28 2023 with John Sheppard
Cabins assessed: 3-22, 3-24, 3-25, 1-22, 1-24

Overall:

Urgent work:

Three of the cabins require work on roof to halt water damage (3-22, 3-24, 3-25)
We need to decide what to do with 1-22

Most could be brought back to habitable status
Exception: Hill 1-22 is not salvageable

3-22

- Door locked – Need to get in here but it means breaking the door down or busting a window
- Level, back a bit dodgy but not bad
- Needs new roof - leaking?

3-22

Roof exterior

Cabin 3 – 22 in need of urgent roof repair and removal of debris

3-24

- Full of wood, sink
- Hole in roof
- Floor rotting
- Need tarp
- Back room that's walled off. Big hole in there.
- Not sure if there's a septic
- No hydro - Be very difficult to hook back up

3-24 - back

Cabin 3 – 24 in need of urgent roof repair , removal of debris, replacement of rotting wood

3-25

- Back room? Jammed closed, we think it is rotting.
- Needs new roof
- Floor needs to be levelled
- Not sure where the septic is. There should be one.
- There is hydro

3-25

Cabin 3 – 25 in need of urgent roof repair , removal of debris, repair of water damage
