**SUBJECT: 4 BRISTOL AVENUE, APPLICATION #A2023-0222**

To whom it may concern:

I live at 20 Bristol Avenue and I have a big concern of this request to widen the driveway to 8.6 Meters or 11.6 Meters as outlined on the post.

Our street is very busy as there is many schools in the area and there is many kids walking and at school starting and pick up there is many cars on the road already in which is already unsafe.

Our neighborhood is a residential area and I cannot see why they need such wide driveways. We would be turning the front of the house into parking lot and not a driveway.

There is concerns already that our sewers cannot keep up with the runoff and by removing more natural lawn to absorb some of this we will be making this worse.

The standard width of a double is between 20 – 24 feet. They have already cut the driveway themselves as I do not believe there was a permit to 22 feet, 1 inch. This is already too wide.

I have attached pictures of the driveway measurements below.

Please read and show this at the meeting

Regards

Ross Knipe
