Application Number: A-2023-0219

Hello,

I would like to address the committee to share my concerns relating to the above mentioned application number. I have the following concerns relation to the said application,

1. I have water ponding on my property along the property line due to the significant grade change on 3 Gladiolus Street.
2. The storage shed constructed in the backyard is constructed exactly on top of an existing regional storm catch basin, hence the natural surface run-off is not draining and instead is ponding on neighbouring properties.
3. Hardscaping in the backyard has been constructed without an appropriate stormwater and groundwater management system causing adjacent properties to have standing water.
4. The increase in imperviousness of the property has contributed to worsening the management of stormwater.

Feel free to contact me if you require any further information.

Thank you

Sameem Shah
